Hiring Manger

I am writing to express my enthusiasm for the opportunity within your organization, as I am eager to contribute my skills in **frontend and full stack development**. With hands-on experience in **React.js, Django, and RESTful APIs**, I have built responsive and scalable applications during my internships and am passionate about delivering impactful digital solutions.

During my internship at **Janki Prefab System**, I developed a company website from scratch using React.js (frontend) and Django REST Framework (backend). This project improved mobile engagement by 30% and reduced API response time by 40%. Additionally, at **Job Vacancy Result**, I worked as a Frontend Developer Intern, where I created new layouts and sections that reduced bounce rate by 20% and enhanced overall user navigation. These experiences have strengthened my **problem-solving, UI/UX design, and collaboration skills**..

Beyond technical expertise, I bring strong organizational skills, critical thinking, and a collaborative mindset that enable me to manage tasks effectively and contribute positively to a team-driven environment. I am eager to apply this blend of **technical knowledge and teamwork** to your esteemed organization.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with your team's goals.

Yours faithfully,

Rohit Dhyani
